

CTCI Foundation International Students Online Job Matching Platform

Purpose

The CTCI Foundation, founded in 1959 as a non-profit organization, provides a platform where companies and international students can conduct online job matching. This enhances opportunities for international students to work in Taiwan during their studies or after graduation and assists companies in recruiting international talents.

Contents

- Job Openings Zone: Company introductions and job openings, including internship programs or local job vacancies (overseas career opportunities may also be available)
- Regulations Zone: Regulations related to international students working in Taiwan
- Video Zone: Experience sharing from the international student alumni; application and career advice from the company's HR department; documentary video on the work permit application and other regulations of Taiwan
- Member Area: Viewing and modifying registration information, job saving, and matching settings

Participating Enterprises

Accton Technology Corporation	Advantech Co., Ltd
AMSL Holding N.V	ASUSTeK Computer Inc.

United Microelectronics (UMC)	Wistron Corporation

.... more than 30 well-known companies (continuously increasing)

Registration Information

1. Registration: Scan DM QR Code or visit <https://act.ctci.org.tw/TMC/Introduction>
2. No registration deadline.
3. Free access to the job matching platform.
4. Applicants will be asked to upload a resume, but no fixed format is required.

Target attendees

International students with bachelor's, master's, or doctoral degrees in science, engineering, and business administration are particularly welcome, especially new graduates and seniors.

Remarks

1. The CTCI Foundation will seek consent from applicants prior to the dissemination of data to the listed recruiters. Applicant data will not be shared with non-related parties.
2. Candidates chosen for interviews will receive individual email invitations sent by the companies.
3. Applicants might receive no response. There are several reasons why this might be the case, including companies conducting ongoing screening processes, recruiters not having enough time to respond to each job seeker, applicants not meeting the qualifications for the position, etc.
4. As the number of participating companies and job openings may continuously change, the platform will proactively send notifications about new job opportunities. Applicants are welcome to log in regularly to browse and apply for positions.
